

SKIN CLASSIC

Skin Classic is a non-laser, direct high frequency technological device.

HOW DOES SKIN CLASSIC WORK?

Skin Classic uses a combination of high frequency radio and electrical currents to dehydrate and vaporize moisture in skin tissue. A sterilized microneedle is applied to the skin which electro-desiccates and electro-coagulates minor irregularities on the skin's surface.

WHAT CONDITIONS DOES SKIN CLASSIC TREAT?

- Skin tags
- Milia
- Fibromas
- Flat hyperpigmentation
- Cherry Angiomas
- Blackheads
- Acne/pimples
- Clogged pores
- Sebaceous hyperplasia

WHAT ARE SKIN CLASSIC CONTRAINDICATIONS?

Skin Classic is not for the treatment of Moles, Warts, Melasma, Lesions of any kind or Hyper-pigmentation larger than a dime.

Skin Classic cannot be used on clients with the following conditions: Pregnancy, Pacemakers, Lupus, Accutane Use (even after 6 months of taking Meds).

I have read the above information.

SKIN CLASSIC HIGH FREQUENCY CONSENT

The undersigned acknowledges that Teresa Tandy has explained the nature of the above treatment procedure, including the possible risks and dangers, including, infection, hyper or hypo-pigmentation, redness, edema, or bruising. As with any cosmetic procedure, the treatment goal is for esthetic improvement, not perfection. The number of treatments necessary will vary between individuals and the areas being treated. Several factors, including age, hormonal

activity, skin color, inherited conditions, and other influences may decrease effectiveness of treatment.

I hereby consent to Teresa Tandy performing the following:

Skin Classic Treatment on me and in consideration of her doing so, I hereby release and forever discharge Teresa Tanda from all claims, demands, damages action or cause of action arising out of the performance of said treatment procedures. Which heir's executors, my administrators, assign's or I can, shall or may have.

I further agree to No refund of Treatments.

I acknowledge receipt of Skin Care Classic Home Treatment and agree to the following the guidelines as stated on the Home Treatment sheet, including but not limited to:

- Avoiding direct sunlight immediately after the procedure.
- Acknowledging that it is common to feel irritation, as well as redness following the procedure. Some crusting may form on the areas treated.
- Applying a cool compress if the treatment area causes discomfort at the end of the day of treatment.
